NEW HOME CONSTRUCTION DRAINAGE FEE AGREEMENT

Name: _____ Company: _____
Title: _____ Address: _____
Date: _____

I am aware of the terms of Hurst Creek Municipal Utility District's Rate Order (Amended effective March 14, 2014) related to drainage fees. For new home construction, a 2,500.00 deposit ("Deposit") is required prior to construction to cover the costs of an engineering review of the required drainage plan and inspection of the final drainage construction. The Deposit fee must be submitted to the District before the District will accept a drainage plan for review.

In addition, if the District incurs engineering or inspection costs related to a drainage permit in excess of the initial Deposit, the District will invoice me for the additional costs it incurs. Any such costs billed to me will be due to the District within 30 days of the date of the invoice. If the costs the District incurs are less than the Deposit, the District will refund the excess amount to me at the time the meter is transferred from me to the homeowner. The District will only transfer ownership of the meter once outstanding amounts due are paid to the District in full.

We appreciate your consideration of this matter. Please sign and return this acknowledgement form with the Deposit and your drainage plan to the District. We will begin review of the drainage plan once we have received the acknowledgement and Deposit.

Acknowledged and agreed:

Name, Title

Date

Please return this signed and dated form and the deposit along with your Drainage Plan to:
